STERILE

PARASORB® COLLAGEN CONE WITH ANTIBIOTIC

NEW
PRODUCT

Resorba Parasorb® GentaCoil Cones are high-density haemostatic collagen cone with added amino glycoside antibiotic gentamicin for local protection from infections.

Resorba Parasorb® Cones Genta

- Treatment of an extraction socket without bony defect but obvious signs of infection
- Prevention in case of risk patients (diabetics, multimorbid or immunocompromised patients, etc.)

Illustrative example of socket healing patterns after extraction.

Untreated alveolar socket.

Socket treated with RESORBA® dental cone.

**NEW
PRODUCT**

FROM SMART SYNTHETICS TO NATURAL BONE

RESORBA® Synthetic Bone

YOUR VIABLE
OPTION

Biphasic Formulation

**B - Tricalcium Phosphate (B-TCP)
+ Hydroxyapatite (H)**

Key Features

- Maximum permeability
- 70% global porosity – similar to cancellous bone
- Different shapes & ratio available
- Osteoconductive – provides a scaffold for new bone growth
- Easy to use
- Biphasic composition of HA and TCP provides optimum performances for a gradual replacement of the substitute by human bone

- ✓ 30+ years of clinical experience
- ✓ More than 1 million units manufactured

Key Indications

- Periodontal/Intrabony defects filling
- Ridge augmentation
- Sinus lifts
- Implant preparation, placement in extraction sites
- Cystic cavities filling

**For more Histological information and
Clinical Studies on Resorba® Synthetic Bone:**

Resorba_Synthetic_Bone_Ozdent.pdf](http://www.ozdent.com/images/2026/Resorba_Synthetic_Bone_Ozdent.pdf)

Therapeutic Suggestions

- Use as an autograft extender
- **Implantology:**
 - Guided Bone Regeneration procedures (GBR)
 - Sinus-lift augmentation
 - Vertical ridge augmentation
 - Horizontal alveolar ridge augmentation
 - Alveolar regeneration – Extraction socket
- **Periodontology:**
 - Intra-osseous pockets
 - Furcations

FLEXIBLE COLLAGEN MEMBRANE WITH CONTROLLED RESORPTION TIME

Adaptable – dry or wet
Strong – easy to suture
Cross-linked – for desired barrier function
Cuttable – size or shape can be adjusted with scissors

Easy to use
on both sides

Product Description

RESORBA® EasyFlex is a resorbable membrane made from porcine dermis-sourced collagen, aimed for guided bone and tissue regeneration (GBR & GTR).

Due to its substantially proven biocompatibility and low immunogenicity, porcine has been

used in a variety of maxillofacial procedures for many years.

RESORBA® EasyFlex is a cross-linked collagen membrane that combines a predictable resorption time and flexibility. Providing the desirable barrier durability for 12 weeks.

Key Indications

RESORBA® EasyFlex is a resorbable membrane. It is intended for use in periodontal/dental surgery procedures, for placement in areas of periodontal defect, dental implant, bone defect or ridge reconstruction; to support wound healing post surgery.

RESORBA® EasyFlex is intended to create a physical barrier at the surgical site to prevent the

colonisation of the underlying bone site by soft tissue cells (connective and epithelial) for 12 weeks while allowing the diffusion of biological fluids. As the membrane is naturally resorbable, there is no need for a second surgical intervention to remove it. The total resorption time is 24 weeks.

RESORBA® EasyFlex is recommended for use with a bone graft material to promote new bone healing.

STERILE

NON-ABSORBABLE MONOFILAMENT SUTURES

Resorba Resopren® sutures are premium blue monofilament threads made from polyvinylidene difluoride (PVDF).

Designed for exceptional performance, these synthetic sutures are hydrophobic, chemically inert, and highly resistant to ageing, ensuring durability and reliability in surgical applications.

Resopren® Monofilament Non Absorbable PVDF Sutures

- ✓ **Monofilament & Chemically inert Material:** Has no capillary action for faster uncomplicated healing
- ✓ **Extremely Supple:** Offers superior pliability for precise suturing and comfortable suturing
- ✓ **Patient Comfort:** The ends of the suture remain soft and supple over time
- ✓ **Hydrophobic, Flexible and Elastic:** Provides excellent handling and knot security during suturing
- ✓ **Highly Resistant to Ageing:** Maintains strength and integrity over time for long-term wound support.

Properties

- **Colour:** Blue
- **Chemical name:** Polyvinylidene difluoride
- **Thread diameter:** USP 7-0 – 2 (0.5-5 metric)
- **Types of packaging:** Needle-thread-combinations
- **Sterilisation method:** Ethylene oxide
