

JULY SURGERY PROMOTIONS

DYNEK

Surgical Catgut

Monofilament plain and chromic surgical catgut. Natural. Absorbable

- A specialised spinning and grinding process creates a catgut suture strand of uniform diameter
- The suture strand is further polished to achieve maximum smoothness for reliability and strength
- Uniform diameter of plain and chromic surgical catgut sutures allows for an even absorption rate
- **Chromic catgut** is chromicised before it is spun to maintain the even absorption rate
- Optimal tensile strength and in vivo performance
- Manufactured from regulatory approved intestinal serosa of cattle
- Absorption through enzyme digestion:
 - **Plain** surgical catgut sutures, 7 to 10 days
 - **Chromic** surgical catgut sutures, 20 to 40 days
- Available in sterile pre-cut lengths of various sizes
- Sutures made with 300 series stainless steel
- Up to five-year shelf life

GrandioSO Unlimited Cluster Shade Composite

4mm universal composite in five Cluster-Shades.

The new universal composite GrandioSO Unlimited aesthetic material can be applied in increments of up to 4mm into the cavity and is indicated both for the anterior and posterior regions. You therefore only need one packable universal composite.

With an impressive filler content of 91% by weight, GrandioSO Unlimited is setting new standards in the high-performance composites class when it comes to stability and strength. The low volume shrinkage of 1.44% reduces the danger of poor marginal gap formation and marginal discolouration, and contributes to the most high-quality restorations.

Thanks to the simplified shade system, the 5 Cluster-Shades are able to cover all 16 classic VITA® shades:

GrandioSO Unlimited	A1				A2		A3			A3.5					A4	
VITA® classical	A1	B1	C1	D2	A2	B2	A3	B3	D4	A3.5	C2	C3	D3	B4	A4	C4

VO6257

Trial Pack

\$116.42

Syringe Pack

\$629.79

Includes: 5x 4.5 g syringe (A1, A2, A3, A3.5, A4) + shade card

Profluorid + Biomin Fluoride Varnish

Significantly hardens weakened enamel – in four pleasant flavours.

The established fluoride varnish - VOCO Profluorid Varnish - gets the addition of bioglass from BioMin.

This invisible bioglass dissolves in the presence of saliva and releases calcium and phosphate ions, which supports the remineralisation of the tooth.

In combination with the fluoride from the varnish, crystalline structures form on the tooth surface, which for example can significantly harden acid-weakened enamel.

VO1428
Composite Set

\$297.80

Includes: 3x 2g syringe Bifix Veneer LC, 3x 2.5g syringe Bifix Veneer Try-In (bright, clear, warm) + accessories

**20%
OFF**

Safe and aesthetic – veneer luting with optimised workflow.

The particularly aesthetic light-curing nanohybrid luting composite Bifix Veneer LC filled with 81% by weight was specially developed for the simple and safe adhesive luting of veneers, inlays and onlays made of composite or ceramic.

The clear shade concept with the three shades - bright, clear and warm - makes placing veneers easy and enables a positive effect on the aesthetic result.

Thanks to the precisely coordinated try-in pastes, choosing the right shade is easy and the final result can be checked in advance.

Profluorid

Fluoride Varnish

Flavours:
Caramel
Cherry
Mint
Melon
Cola Lime
Pina Colada

Fluoride-containing dental desensitising varnish (5% NaF). Hypersensitivity is mainly caused by exposed dentinal tubules. Therefore, the aim of treatment is to seal these tubules.

Profluorid Varnish is a fluoride-containing varnish to effectively seal dentinal tubules exposed on the necks of teeth or after cavity preparation.

The advantages at a glance:

- Fast desensitisation and fluoride release (22,600 ppm fluoride)
- Easy to apply – moisture tolerant
- Available in seven pleasant flavours
- Economical application in thin layers, high yield

Vittra APS Unique Universal Chroma Composite

A sub-micrometric universal-chroma composite. Recommended for permanent and deciduous teeth, direct restorations on anterior and posterior teeth (classes I, II, III, IV, V and VI).

Universal chroma: From Bleach to D4 with just one shade of composite! It does not require stratification in most cases and allows the adoption of a simple incremental technique, without using different degrees of opacity/translucency.

Chameleon effect: Copies the shade of the dental substrate during the polymerisation process, achieving perfect mimicry thanks to the chromatic mirroring characteristics of the composite.

WM-FG55160
4g syringe + tips

\$65.23

Exclusive APS Technology (Advanced Polymerisation System): Longer working time even under the reflector's light, more efficient photopolymerisation, increased mechanical properties, superior esthetics with shade transmission and mirroring facilitated thanks to the more transparent photoinitiators of the APS technology.

High esthetics and mechanical resistance: In addition to excellent shine and polishing, it has high rates of flexural strength and fracture toughness to withstand the stress resulting from masticatory forces.

PRIMMA Art Temporary Self Curing Material

PRIMMA Art is a self-curing methacrylate composite, which offers better esthetics, strength and ease of making short and long term provisionals and mock-ups.

Low release of heat - Composite is safe for use in vital teeth: The lower the energy released by the reactions of the polymer, the lower the quantity of heat produced, reducing the possibility of causing sensitivity and providing more comfort for the patient.

Consistency with rheological effect: Viscosity that promotes a perfect flow in the filling of the mould, facilitating the reproduction of details.

Fluorescence compatible with natural tooth: Great shade fidelity true to Vita shade guide.

Shades A1, A2,
A3, B1, Bleach

75g Cartridge

\$157.85

Indications:

- Making of provisional teeth for indirect procedures, inlays, onlays, crowns, veneers and bridges.
- Making of long-term provisional teeth.
- Rebasing prefabricated structures in composite, polycarbonate or metal.

PREVESTDenPro®
THE FUTURE OF DENTISTRY

Cerafill RCS

Bioceramic Root Canal Material

WMPD-40037-2
2g Syringe + Tips

\$62.70

Cerafill RCS is a ready to use, injectable, premixed filling and sealing material which is based on the bioceramic technology.

It is an alumina free, calcium silicate based material with excellent handling characteristics and superior physical properties.

This highly radiopaque hydrophilic sealer forms hydroxyapatite upon setting and chemically bonds to dentine. It sets with moisture naturally present within dentine.

PREVESTDenPro®
THE FUTURE OF DENTISTRY

Cerafill Putty

Bioceramic Permanent Root Repair

WMPD-40049
2g Syringe + Tips

\$69.30

Cerafill Putty is a ready-to-use, premixed, bioceramic paste developed for pulp capping, permanent root repair and permanent obturation/filling of root canals.

It is an insoluble, radiopaque composition, which requires the presence of water to set and harden.

DIRECTA Calasept Plus Calcium Hydroxide Paste

WM-DT-1240100
4 x 1.5ml Syringes
+ Tips

\$88.00

Calasept Plus is a ready to use paste in an airtight syringe for direct and indirect applications.

The smooth consistency of Calasept Plus simplifies direct application of the material with a small tip deep into the root canal for a temporary root filling, or for direct application on an exposed pulp.

Allcem Dual Cure Resin Cement

Exhibits excellent adhesion to different surfaces.
High radiopacity for easy radio graphic diagnosis.
Dual cure formula allows for light and self curing for areas where light cannot penetrate.
High resistance to wear.

Recommendations:

- Porcelain fused-to-metal crowns and bridges;
- Crowns and bridges with minimal tooth structure;
- All ceramic/porcelain and pre-cured composite crowns, bridges, inlays and onlays (high noble, noble, and base metals);
- Metal crowns, bridges, inlays and onlays;
- Maryland bridges (resin bonded bridges);
- Endo posts.

Shades A1, A2, A3,
Translucent

5g Syringe + tips

\$44.20

Allcem Veneer APS Resin Cement

Shades A1, A2, A3,
Bleach M, Opaque
White, Translucent

2.5g Syringe + tips

\$77.44

Light-curing resin cement for cementation of ceramic and composite veneers. Ideal for no-prep veneers.

The APS Technology minimises visual alteration of shade and opacity of the cement before/after photo polymerisation. Also offers longer working time under ambient light.

Possesses excellent viscosity, enabling easy handling and application.

Fluorescence offers appearance similar to natural tooth.

Highly radiopaque formula facilitates radio graphic diagnosis.

Ambar Universal APS Light Cure Adhesive

Self-etching light-curing adhesive system for enamel and dentine recommended for intracanal application. It has enhanced MDP, resulting in increased adhesion strength and improved adhesive film stability.

Characteristics:

- High adhesion in different forms of application: total acid etching, selective etching on enamel and self-etching.
- Adhesion to different types of surface: metals, ceramics, composites and fiberglass posts.
- Versatility with minimal sensitivity.
- Greater esthetics (colourless aspect).

Zhermack Elite Transparent

Elite Transparent is a transparent fluid two-component addition silicone.

Formulated for making transparent silicone masks in the laboratory for composites and light-curing resins.

Advantages:

- Shorter working times;
- Composites or resins act on more compact surfaces without dispersion layer, thanks to the light curing in an oxygen free atmosphere;
- Easy and quick to apply;
- Possibility to retain the mask for future use.

Class 6 Helix Test Strips

WM-D-HTSC6
Pkt 250

\$127.00

**BUY 3
GET 1
FREE**

ORO Helix Test Strips are specially designed to monitor the performance of pre-vacuum steam sterilisers by evaluating effective air removal and steam penetration in hollow or complex medical instruments.

Manufactured and tested according to EN ISO 11140-1:2014 and EN ISO 11140-4 standards, these indicators provide highly accurate and repeatable sterilisation monitoring results.

The strips exhibit a distinct and reliable colour transition from pink to dark brown / black, enabling fast and confident pass-fail interpretation during routine sterilisation cycles.

Bowie Dick Test Pack

ORO Bowie-Dick Test Packs are designed to monitor air removal efficiency and steam penetration performance in vacuum-assisted steam sterilisers.

Manufactured in compliance with ISO 11140-1 and ISO 11140-4, these test packs provide accurate, consistent, and easy-to-interpret results for routine sterilisation validation.

Ideal for daily autoclave testing, each pack features a Type-1 indicator dot on the top surface for quick identification of processed and unprocessed packs.

A clear and sharp colour transition from blue to pink offers a reliable pass/fail indication, helping healthcare facilities maintain the highest sterilisation standards.

\$169.00

Protexis PI Surgical Powder Free Gloves

Synthetic Polyisoprene, Latex Free.
Colour: Natural

Protexis PI Surgical Gloves are a multipurpose solution that offers tactile response with barrier protection.

Made from synthetic polyisoprene (PI), latex free.

Proprietary hand mould with an independent thumb design allows for an anatomical fit and natural movement in the fingers, thumb and palm.

Featuring an interlocking, beaded cuff design that helps to reduce roll-down.

Whiteness HP AutoMixx Hydrogen Peroxide In-Office Whitening

Hydrogen peroxide whitening gel for in-office use.

Delivered in a self-mixing syringe system, allowing for single application per session.

Easy to handle: The phases are mixed via a self-mixing tip and the product is released ready for use, with no need for manual manipulation.

Single application per session: The product may be kept up to 50 minutes in contact with the teeth without having to be changed, since the pH remains neutral and stable during the whole session.

Contains calcium: Improves enamel microhardness against demineralisation and keeps the enamel integrity during the whitening process.

Kits

1x 5g automix syringe, 5x self-mix tips, 1x Topdam syringe, 1x Neutralise bottle and tips.

\$88.00

Refills

1x 5g automix syringe, 4x self-mix tips, 4x brushing tips, 1x Topdam syringe

\$37.95

With heat blocker: In cases when the professional desires to use some sort of light source, the heat blocker prevents the heat generated by these sources from reaching the pulp, preventing hypersensitivity.

Available in:
35%

Whiteness Perfect Carbamide Peroxide At-Home Whitening

Carbamide peroxide whitening gel for supervised at-home use. It contains Potassium Nitrate and Sodium Fluoride as desensitising agents. Neutral pH.

Double Desensitising Action: Natural action of potassium nitrate and occlusive sodium fluoride. Potassium nitrate is an effective agent in the treatment of hyperesthetic dentine. Its action is based on the fact that the increased concentration of extracellular potassium depolarises the membranes of nerve fibers, blocking the passage of the stimulus, reducing hypersensitivity.

Excellent viscosity: Does not run off the tray.

Choose your intensity

HYDROGEN PEROXIDE

Hydrogen peroxide is a potent oxidizing agent.

It releases oxygen free radicals which break down large pigment molecules which results in whiter teeth.

Hydrogen peroxide breaks down almost immediately, releasing all the oxygen ions within 90 minutes.

CARBAMIDE PEROXIDE

Carbamide peroxide is hydrogen peroxide compounded with urea, which stabilises the formula.

Carbamide peroxide breaks down into urea and hydrogen peroxide, which in turn breaks down to oxygen and water.

Carbamide is 50% spent in the first 2 to 4 hours, the remainder breaks down over the next 2 to 6 hours.

6% Hydrogen Peroxide

Maximum 1.5 hours wear time per day.

9% Hydrogen Peroxide

Maximum 30 minutes wear time per day.

10% Carbamide Peroxide

4-6 hours wear time overnight.

16% Carbamide Peroxide

4-6 hours wear time overnight.

22% Carbamide Peroxide

Black Diamond Toothpaste

The patented Black Diamond Toothpaste is a revolutionary concept - formulated with innovative nanosphere technology.

Nanospheres consist of amorphous calcium magnesium phosphate nano particles.

The nanospheres in our toothpaste penetrate deep into the dentine and actively release minerals to occlude the tubules. This alleviates discomfort from dentine hypersensitivity.
