Caredent PerioTape Floss

The new 2nd Generation Periotape sets a new benchmark in interdental cleaning.

Featuring an advanced Ultra High Molecular Polyethylene (UHMPE) fibre and a smooth microcrystalline wax coating, Periotape glides effortlessly through tight contacts while effectively removing plaque and food debris. Engineered for strength, comfort and sustainability, Periotape delivers a superior flossing experience for both clinicians and patients.

Efficient Plaque & Debris Removal: Helps remove plaque biofilm and trapped food particles from areas toothbrushes can't reach, supporting improved oral hygiene and periodontal health.

Gentle on Gingival Tissue: The flat tape profile and impregnated wax coating allow smooth passage between teeth, minimising tissue trauma and maximising patient comfort.

Exceptional Strength: Advanced UHMPE fibres provide excellent resistance to shredding, fraying and breakage, even in tight interproximal spaces.

Allcem Veneer APS Resin Cement

Light-curing resin cement for cementation of ceramic and composite veneers. Ideal for no-prep veneers.

The APS Technology minimises visual alteration of shade and opacity of the cement before & after photo polymerisation. Also offers longer working time under ambient light.

Possesses excellent viscosity, enabling easy handling and application.

2.5g Syringe + Tips

\$61.88

inc GST

Shades: A1, A2, A3, Bleach M, OW, Trans

Allcem Dual Cure Resin Cement

High radiopacity for easy radio graphic diagnosis.

Dual cure formula allows for light and self curing for areas where light cannot penetrate.

Double Body Syringe + Tips

\$38.67

inc GST

Shades: A1, A2, A3

Recommendations:

Porcelain fused-to-metal crowns and bridges

Crowns and bridges with minimal tooth structure

All ceramic/porcelain and pre-cured composite crowns, bridges, inlays and onlays

Ambar Universal APS Adhesive

Self-etching light-curing adhesive system for enamel and dentine recommended for intracanal application.

It has enhanced MDP, resulting in increased adhesion strength and improved adhesive film stability.

BPA free.

Adhesion to different types of surface: metals, ceramics, composites and fiberglass posts.

5ml Bottle

\$64.45

inc GST

Allcem Core Dual Cure Resin Cement

Dual-curing resin cement for core build-up and adhesive cementation of intraradicular posts and prosthetic crowns.

3-in-1 product: Indicated for core build-up, cementation of posts and crowns.

Dual curing: Chemical curing in environments where light does not reach and light curing to facilitate the core build-up work.

Adhesion to any substrate: Excellent adhesion to dentine, enamel, CAD/CAM blocks, ceramic, porcelain, resin and metal.

6g Syringe + Tips

\$56.72

inc GST

Shades: A1, A2, A3, OP

Allcem Orthocem Cement

Light-curing orthodontic cement for the bonding of orthodontic brackets.

Practicality and Agility: The photoactivation gives the professional total control of bracket bonding and the immediate installation of the orthodontic arch.

Adhesive strength: The balanced adhesiveness avoids adhesive failure throughout the treatment and at the same time facilitates removal of the bracket at the end of treatment.

4g Syringe

\$61.00

inc GST

Ambar Universal Plus APS Adhesive

Optimize your clinical time with Ambar Universal Plus. With silane in its composition, it promotes an advanced adhesion standard to different substrates. Fewer steps, more clinical success.

Reduces steps in the cementation of prosthetic parts: Self-etching adhesive with silane.

APS Technology: Colourless appearance that does not interfere with esthetic results and provides excellent degree of conversion.

5ml Bottle

\$67.53

inc GST

30% Off!**Kohler Impl-Safe Perio Probe CP15
#3310****\$137.10**
inc GST

Impla-Safe Instruments for prevention and non-surgical management of Periimplantitis - designed by Dr. George Kotsakis.

Designed for assessing Peri-Implant health: Use the flexible probe to measure probing depth and detect calculus, providing tactile feedback to avoid tissue damage.

Flexible, titanium tip.

**Kohler Impl-Safe Cement Explorer
#3311****\$137.10**
inc GST

Impla-Safe Instruments for prevention and non-surgical management of Periimplantitis - designed by Dr. George Kotsakis.

Designed for detecting excess cement: The cement explorer identifies excess cement around the implant, which can cause inflammation.

Titanium tips.

**Kohler Impl-Safe Cement Remover
#3312****\$153.00**
inc GST

Impla-Safe Instruments for prevention and non-surgical management of Periimplantitis - designed by Dr. George Kotsakis.

Designed for removing excess cement: If excess cement is found, the cement remover with micro-serrated edges efficiently removes it in one motion.

Titanium tips.

Kohler Impla-Safe Curette 3/4 #3313

\$137.10
inc GST

Impla-Safe Instruments for prevention and non-surgical management of Periimplantitis - designed by Dr. George Kotsakis.

Designed for removing visible calculus: Use the titanium curette to carefully remove visible calculus from the implant abutment without damaging the surface.

Titanium tips.

Kohler Impla-Safe Tweezers #3314

\$152.15
inc GST

Impla-Safe Instruments for prevention and non-surgical management of Periimplantitis - designed by Dr. George Kotsakis.

Designed for burnishing implant surface and removing biofilm: Use the titanium-coated micropliers with gauze soaked in saline to burnish the implant surface and remove biofilm, followed by irrigation of the sulcus.

ZrN coated.

DIRECTA

Directa Matrix Strips

The strips are made of a super thin strong plastic with high tensile strength and flexibility that ensures that the band can be drawn tightly and snugly around the tooth giving excellent marginal adaptation.

Crystal clear plastic ensures complete polymerisation.

Condac37 Etch 37% Phosphoric Acid

Water-based gel containing phosphoric acid at 37%.

Excellent consistency: Easy application, does not run off the application site.

Good water solubility: Easy removal.

Differentiated colour: The blue dye facilitates control during application.

Recommendations: Etching of the enamel and dentin to improve the adhesion of restorative materials to the tooth; Coloured product to facilitate its control during the application.

2.5ml Syringes + Tips

\$6.75

inc GST

12.5ml Syringe

\$7.50

inc GST

Condac Porcelana 10% Hydrofluoric Acid

Low viscosity gel, containing 10% hydrofluoric acid, for porcelain conditioning.

Easy removal: Good affinity for water.

Colour contrast: The red dye facilitates application control.

Excellent consistency: Easy application, does not run from the applied area.

Recommendations: Etching of dental veneers with the objective of increasing adhesion in restorative processes; The conditioning is of paramount importance for having an excellent interaction between the resinous cement and the ceramic restoration, leading retention and making the restoration resistant.

2.5ml Syringe + Tips

\$14.64

inc GST

OssGuide Collagen Membrane

Resorbable Membrane for Guided Bone Regeneration (GBR) Bone Grafting Procedures.

OssGuide membranes can withstand the forces exerted by sutures. These membranes are cross-linking type I collagen membranes

Easy to handle and adapts excellently to contours.

High tensile strength minimises risk of tearing and ensures stability of adhesion to the bone defect area.

Can be utilised on both sides prior to or following hydration.

Supports new bone formation and soft-tissue healing: Multi-pore structure enhances rapid blood supply, expediting the process of new bone generation.

Functions as a bioresorbable scaffold and excellent barrier.

TG-1, 15mm x 20mm

\$147.24

inc GST

OpenTex Non-Resorbable Membrane

OpenTex® Non-Resorbable PTFE Membrane is a pure medical-grade polytetrafluoroethylene (PTFE) sheet with inert biological features and predictable barrier effect.

Non-resorbable membrane is sustainable for surgical procedure with no primary closure. OpenTex® Membrane is ideal for space-making feature providing enough space for host cells to adhere to grafting materials.

OpenTex® is designed to function as a physical barrier to avoid gingival cell invasion, thus providing a favorable environment for neovascularization and bone derived cells to repopulate and repair the defect.

OT-T02, 17mm x 25mm

\$90.00

inc GST

Sol-Care Saline Pre-Filled Syringe

0.9% Sodium Chloride, 10ml.

Effective and efficient IV flushing for various vascular access devices.

Ready-to-use, improve clinical workflow.

Avoid needlestick injuries.

Maintain catheter patency.

Decrease risk of medication errors.

10ml, Pack of 30

\$26.55

inc GST

Surgical Gut Sutures

Monofilament plain and chromic surgical catgut. Natural. Absorbable

- A specialised spinning and grinding process creates a catgut suture strand of uniform diameter
- The suture strand is further polished to achieve maximum smoothness for reliability and strength
- Uniform diameter of plain and chromic surgical catgut sutures allows for an even absorption rate
- **Chromic catgut** is chromicised before it is spun to maintain the even absorption rate
- Optimal tensile strength and in vivo performance
- Manufactured from regulatory approved intestinal serosa of cattle
- Absorption through enzyme digestion:
 - **Plain** surgical catgut sutures, 7 to 10 days
 - **Chromic** surgical catgut sutures, 20 to 40 days
- Available in sterile pre-cut lengths of various sizes
- Sutures made with 300 series stainless steel
- Up to five-year shelf life

JustStop Haemostatic Sterile Gauze

JustStop Haemostatic Gauze is a safe and effective haemostatic agent made from Oxidised Regenerated Cellulose (ORC) derived from plants.

On contact with blood or exudate, the gauze becomes a viscous gel which packs wound voids, seals capillary ends, and activates the clotting system.

The dressings can be removed painlessly and without interruption to the wound site.
