Restoratives

Opus Bulk Fill APS
Light Curing Composite

4g Syringe

$34.65 inc GST

Longer working time:
Working time under ambient light long enough to perform the restoration at once.

Efficiency and agility:
Single-filling composite

Great curing depth:
Possibility of increments of up to 5mm.

Shade predictability:
Minimal change in visual shade before and after photopolymerization.

Greater opacity:
The composite has enough translucency to allow good depth of cure, becoming more esthetic and opaquer after photopolymerisation.

High mechanical strength:
Approximately 79% of mass fillers.

37% Phosphoric Acid
Syringe 12.5ml

Shades A1, A2, A3

FenderMate Prime
Class II Shield and Matrix

FenderMate Prime is a combination of a **preparation shield** and **matrix** for **Class II fillings** of primary teeth, where quick and simple solutions are highly valued.

FenderMate Prime is an **interproximal plastic wedge** with an **inbuilt steel plate**. The "boat-shaped" tip allows the gingiva to be compressed without damage and reduces the risk for bleeding.

Available in **two sizes**, long and short.

FenderMate Prime Long (neon green) is bendable and can be shaped to the contour of the tooth.

FenderMate Prime Short (neon yellow) has a shorter, more rigid plate for very tight interproximal spaces.

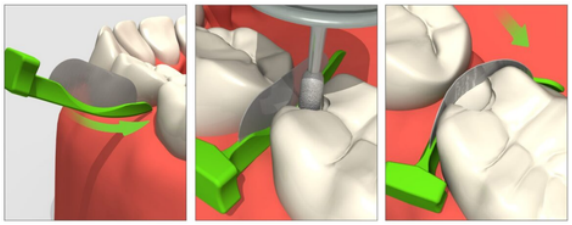

FenderMate Prime Long
Green, Pkt 18

FenderMate Prime Short
Yellow, Pkt 18

DIRECTA

ContactEz Incremental Thickness Gauge

For measuring interproximal gaps.

$95.04 inc GST

Articulating

DIRECTA

Troll®Foil
8 Micron Double-Sided Articulating Foil

TrollFoil is a **super-thin double-sided** articulating foil only **8 microns** thin.
This thin foil provides precise and consistent marking and can be used in a variety of clinical situations, including **wet and dry teeth**.

TrollFoil is **pre-mounted** in a **semi-rigid frame** that keeps the foil flat and stretched making it easy to use.

The double-sided foil has ink on both sides, and the frame prevents you to get colours on your fingers.

Retraction

parkell®

DryZ Blu
Gingival Retraction Paste

This **hemostatic** gingival retraction paste contains **23% aluminum chloride**, which acts quickly to stop bleeding and eliminate crevicular fluid seepage.

Its **creamy consistency** adapts well, seats easily with compression caps or cotton rolls, and rinses off completely without residue—leaving tissues unharmed.

7x 0.5ml syringes + tips
